- Great Features
- NO Traffic Disruption & NO Reinstatement cost
- Your Success Guaranteed or Your Money Back (if purchased online)
- Great Package Options Available (see the online store www.nodig.net.au)
- FREE Shipping (if purchased online)

Great Features

All **NO DIG Moles** features the convenience of a quarter turn forward and reverse control. Operators can quickly change direction by simply rotating the air supply hose quarter of a turn to reverse the tool with full air supply.

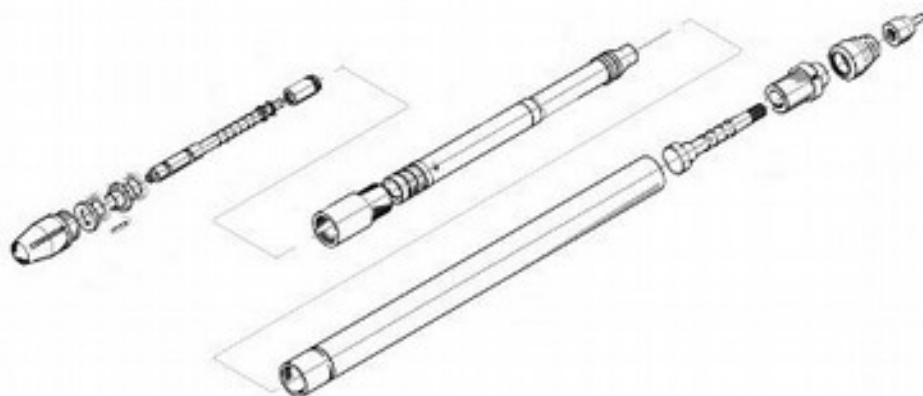

Powerful Hammer Head

The hammer head provides the **NO DIG Moles** rapid penetration and accurate direction even in the toughest soil conditions.

Greater durability and reliability

NO DIG Mole utilizes a bare minimum of moving parts which ensures greater durability and reliability.

Below is an exploded view of a **NO DIG Mole**. Fewer moving parts ensures the mole last very long and it makes it easier to service on site.

NO Traffic Disruption & NO Reinstatement Cost

Going Trenchless with a **NO DIG Mole** will eliminate the cost and the hassle of traffic management along with the complaints that go with it. Traffic management can be a very costly exercise, and can involve many resources, as nearly every road closure (in Australia) needs to follow Australian Standards and must be passed by local Shire regulations.

Reinstatement can be one of the most costly items on any trenching job. Therefore going Trenchless really makes sense.

Repair of road pavements, footpaths and concrete driveways are time consuming and costly. Things like pattern concrete and red asphalt driveways can be very difficult to match and sometimes requires removal of very large section in order to get the repair to blend.

Using a **NO DIG Mole** to drill under the prized Rose Bushes or the Pattern concrete driveway will save you grief and money right from the start.

"We love our gardens and we don't want them destroyed just for one little cable. The NBN is good but please keep my garden INTACT"

Installing pipes the Trenchless-way can saves you considerable cost and time.

Contractors avoid disturbing pavement, roads and landscaped surfaces which, greatly reduces the need to restore asphalt or concrete once the job is completed.

Realize fantastic savings by using the **NO DIG Mole** to install Telecommunication cables, Fiber Optic (for the NBN), Electric cables, Gas and Water pipes under roads, footpaths and driveways.

Specifications				
Diameter	Length	Weight	Air Consumption	Max. Pressure
45 mm (1-3/4in)	910 mm (36in)	8 kg	25 cfm	760 kpa (110psi)
54 mm (2-1/8in)	1220 mm (48in)	11 kg	35 cfm	760 kpa (110psi)
65 mm (2.5in)	1100 mm (43in)	20 kg	40 cfm	760 kpa (110psi)
76 mm (3in)	1380 mm (54in)	34 kg	50 cfm	760 kpa (110psi)
100 mm (4in)	1740 mm (68in)	73 kg	80 cfm	760 kpa (110psi)
