

NO DIG *Equipment*

The Trenchless Technology Specialists

VM SERIES

**Vacuum Machines
from 500L to 4500L spoil tank**

Powerful, flexible and affordable Multi Purpose Vacuum Machine

Designed to perform a wide range of cleanup jobs. Equipped with high pressure water system to pot-hole to exposed buried utilities to determine their exact location.

Available with tank sizes ranging from 500L to 4500L Mud Tank, petrol or diesel powered engine, 3" or 4" vacuum systems and a wide assortment of tools and accessories to meet your particular job requirements.

Contact NO DIG Equipment today to find out more.

VM3000 Vacuum Machine skid mounted

Lower costs and increase profits

The VM range of vacuum makes cleanups fast, simple and safe & by reducing damage to underground services and eliminating claims by knowing exactly where utilities are buried.

Open up additional sources of revenue...

By enabling you to do new and different types of jobs, from cleaning out valve boxes, culverts and vaults to damage free installations of sign posts, guard rails, power & light poles and more.

VM3000 Vacuum Machine truck mounted

Cyclonic filtration system

Minimises filter cleaning, simply clean and install. 3-stage with cyclone separator & 2-micron poly filter.

Acrylic Urethane paint

Fast and easy to clean, will look good for years to come

Powerful positive displacement blower

High level continuous vacuum, without the need to prime or keep the inlet hose submerged. Ideal for mud removal from roads or grass

Hydraulic operated dumping

Quick easy emptying for all Vacuum Machine. Only the VM500 is already tilted.

High pressure water system

Enables you to quickly and safely pothole to determine the exact location of utilities or bore head. Also includes low pressure high volume spray wand for an assortment of clean up jobs

VM500 Petrol trailer mounted
